

# Green Steps for a Better Earth

We can all make a difference,  
To keep the Earth in balance,  
By planting trees and flowers,  
We'll create a greener power.

We can help the Earth in so many ways,  
By conserving resources every day,  
Let's reduce, reuse, and recycle,  
And turn our waste into something valuable.

We can all do our part,  
To keep the Earth healthy and smart,  
By turning off the lights and taps,  
We'll reduce our carbon footprint in a snap.

So let's work together,  
And make the Earth even better,  
By doing our part every day,  
To keep the planet green in every way.
